

Ammonia  
Urea  
Uric Acid

rids of nitrogen as

[ ]

is regulated by

# The Excretory System

consists mainly of

[ ]  
Are secreted into tubules

where

[ ]

produce

urine

have

are separated into

[ ]

[ ]

where

outside

urethra

[ ]

ureter

renal pelvis

leads to

[ ]

leads to

[ ]

then

[ ]  
(descending then ascending limbs)

peritubular capillaries

many things are reabsorped

into

nutrients are reabsorped

where

Then salt is reabsorped

where

then through

then

[ ]

[ ]

[ ]

where

filtrate

is forced into

[ ]
