

Anatomy and Physiology Terminology

Directions: You will need to memorize these terms, their definitions, and be able to label diagrams of them. I recommend utilizing Chapter 1 in your textbook to help you study.

EXAM: _____

Overview

- Anatomy
- Physiology
- Cell
- Organ
- Organ System
- Organism

Organ Systems - For these terms you will also need to know the general function and the major organs

- Cardiovascular
- Digestive
- Endocrine
- Integumentary
- Lymphatic
- Muscular
- Nervous
- Respiratory
- Reproductive
- Skeletal
- Urinary

Directional Terms

- Anterior
- Deep
- Distal
- Dorsal
- Inferior
- Lateral
- Medial
- Posterior
- Proximal
- Superficial
- Superior
- Ventral

Anterior Body Landmarks

- Abdominal
- Acromial
- Antebrachial
- Axillary
- Brachial
- Buccal
- Carpal
- Cervical
- Coxal
- Crural
- Deltoid
- Digital
- Femoral
- Frontal
- Mental
- Nasal
- Oral
- Orbital
- Patellar
- Pedal
- Pelvic
- Pubic
- Thoracic

Posterior Body Landmarks

- Calcaneal
- Cephalic
- Femoral
- Gluteal
- Lumbar
- Occipital
- Popliteal
- Sacral
- Scapular
- Sural
- Vertebral

Body Planes and Sections

- Sagittal section
- Median (midsagittal) section
- Frontal (Coronal) section
- Transverse (Cross) section

Body Cavities

- Abdominal
- Abdominopelvic
- Cranial
- Diaphragm
- Dorsal Body
- Nasal
- Oral
- Orbital
- Pelvic
- Spinal
- Thoracic
- Ventral Body
